Government Grievance Assessment Report

Case Identification

Grievance ID: G-2023-02-20-001

Date of submission: on or around February 20, 2023

Nature of grievance: Complaint

Category & Subcategory: Sanitation, Garbage Collection

Reported priority: High

Detailed Assessment and Case Study

The grievance reported by a citizen on or around February 20, 2023, pertains to the non-collection of garbage for three months in a specific location, resulting in overflowing bins on the road. The issue is situated in a roadside area with a significant buildup of rubbish, as evident from the provided image. The surrounding area appears unmanaged and dirty, with scattered litter and plastic bags visible. The citizen's complaint expresses frustration and anger, indicating a critical situation that requires immediate attention. The image analysis supports the citizen's complaint, showing a clear accumulation of garbage and litter. The severity indicators suggest a high level of severity, with overflowing garbage and scattered litter posing a risk to public health and safety. The similar cases data reveals a recurring pattern of garbage collection not being performed for an extended period, affecting multiple cities. The department recommended for resolution is the BBMP (Bruhat Bengaluru Mahanagara Palike), and the contact information for the Solid Waste Management Department is provided. The sentiment priority indicates a high urgency level, with the citizen expressing anger and frustration due to the prolonged accumulation of garbage. The expected resolution time is within 7-10 working days, and the risk assessment highlights a high risk of disease transmission, pest infestation, and environmental pollution. The citizen's complaint is a clear indication of a systemic failure in garbage collection, and immediate action is required to address the issue. The responsible department should take necessary measures to ensure regular garbage collection, and the citizen should be informed of the progress and resolution of the issue. The long-term corrective measures should include improving the garbage collection system, increasing the frequency of collection, and providing adequate infrastructure for waste management. The municipal grievance portal and the ward office should be informed of the issue, and the competent authority should take necessary action to resolve the grievance.
